## ABOUT US

Smart Interface Technologies is a leading supplier and installer of Electronic Security, Home Automation and IT equipment in the Western Cape. Established in 2015 the company is fuelled by a sense of professional pride and sets the standard in multiple ways. Smart Interface has partnered with proven quality brands and we pride ourselves on service, all of which is the cornerstone of our company values. Our company culture is based on respect, integrity, a commitment to quality and the drive to serve the needs of our customers.

## End-to-End Solutions Specialist

Smart Interface Technologies takes great care when it comes to choosing brand partners. Furthermore, our quality product range enables us to deliver complete building management systems. Smart Interface Technologies also offers consultations, system design, project management and project support. We provide a complete security, home automation and networking solution all integrated to work as one.

# CCTV

We specialize in tailor made **smart CCTV** system design and installation to cater for various types of applications. These applications include HD IP systems and Smart Home thermal analytics.

## HD IP Systems

High Quality IP based systems which integrates into personalized smart device controlled system.

## Thermal Analytics

Professional CCTV solution

Smart analytics which sends push notifications to any smart device such as mobile phones and tablets in the form of short video clips. This technology integrates into the smart CCTV which detects heat signatures, the devices also have a smart learn function eliminating false detections by 99.9%.

## Intrusion Detection

Smart Interface Technologies specialize in intrusion detection. Highly advanced infrared sensor detection systems for indoor and outdoor applications on various platforms which has not shied away from the aesthetics. The beautifully designed touch screen allow you to control the alarm system from any smart device via a smart app.

## Home Automation

Smart Interface Technologies a leading provider and installer of personalized automation and control solutions, allowing you to control virtually any device in a home or business automatically. Our mission is to deliver an elegant and more affordable way to control and automate lighting, music, video and energy in a single room or throughout the entire home.

At Smart Interface, we believe life is better when everything works together. Smart interface home automation solutions interoperate with nearly 10,000 third-party consumer electronics devices.

## IT/ Networking and Integration

No More eyesores! Smart Interface builds aesthetically pleasing mesh Wi-Fi networks, physical networks and allows the integration of systems to work together. Our routers are robust and reliable for South Africa's ever increasing fibre networks.
